

Competitive Intelligence Report

That Metabolic Guy - Implications for Pristine Image Wellness

Prepared for: Pristine Image Wellness (Troy / DeOnn Wallace)

Competitor: That Metabolic Guy - Blake Uhlenhake

Date: July 23, 2026

Primary source: Facebook page <https://www.facebook.com/p/That-Metabolic-Guy-61578513638539/> (share URL provided: <https://www.facebook.com/share/18zwkeEUdZ/>)

Method: Live Chrome CDP scrape of Facebook (page, videos, reels, about, comments), website review (thatmetabolicguy.com product + business), Instagram public profile. PIW is referenced only for strategic gaps and implications-not as a full operational audit.

Evidence labels used throughout

- Verified = directly observed in UI, page copy, or measured HTTP
- Inferred = reasonable strategic conclusion from verified patterns (not a claimed private metric)
- Unknown = not observable without Insights/admin access

Scope note: This is a competitor intelligence report. Site/CRM hygiene items belong in separate funnel diagnostics and are not treated here as current action items.

1. Executive Summary

That Metabolic Guy is a high-velocity metabolic education + product funnel brand built around one root thesis: symptoms people blame on aging, willpower, or organs are often insulin resistance - and a simple daily protocol can fix the environment so the body responds.

On Facebook alone the page shows ~40,000 followers (as of 2026-07-23) with comment-keyword -> Messenger conversion as the core engine. In sampled threads, author replies routinely redirect keyword commenters to Messenger. Reels show public view counts ranging from low hundreds to outliers above 100K-300K (paid vs pure organic: Unknown). Content is highly repetitive by design: a few winning scripts (fatty liver, "right drinks / high insulin," symptom-cluster -> insulin resistance) are republished as many short video variants with rotating keyword CTAs (RESET, LIVER, INSULIN, ME, GONE).

The commercial backend is explicit: Unicity Feel Great System (Unimate + Balance + time-based eating), sold via long-form page at thatmetabolicguy.com/product with checkout at ufeelgreat.com, plus a second funnel for the network marketing / affiliate opportunity (/business). Risk reduction is strong in messaging (90-day money-back + bloodwork framing). The brand is personal (Blake's IBS / prediabetes / yo-yo story + family results-as claimed on-page).

Pristine Image Wellness competes in the same problem category (insulin resistance, metabolic health, lasting weight loss) with an assessment-led care path (education, guidance, accountability) and local trust signals. Public Facebook scale remains early-stage relative to TMG. The strategic risk is category sameness without TMG's distribution and conversation engine-not a mandate to copy product or network-marketing identity.

Bottom line for PIW (competitor-derived)

Do not clone Unicity hard-sell intensity or claim language without a compliance filter. Do adopt TMG's operating system: one root narrative, high-frequency educational Reels, keyword-based DM CTAs, a single clear CTA path, faster comment-response SOPs, consistent cadence, and condition-bridge educational positioning. PIW's differentiation is assessment-led root-cause care + accountability-not "another Feel Great rep page."

2. Brand Positioning (That Metabolic Guy)

Dimension	Observation	Evidence type
Core message	Metabolic symptoms cluster around insulin	Verified (FB captions, bio, product page)
Value proposition	Simple 2-step daily protocol (drink + food)	Verified (product page)
Target audience	Adults with belly fat, fatty liver, pre	Verified
Brand personality	Approachable male coach; plain-spoken;	Verified
Emotional positioning	Relief + control: "not your willpower,	Verified + inferred
USP (as messaged)	Personal family reversal story + simple	Verified as positioning; not a proof of
Main pain points	Cravings, stubborn belly fat, fatty liver	Verified
Main desires	Stable energy, reverse prediabetes mark	Verified + inferred

Bio stack (Facebook, verified)

- ? Metabolic Health
- ? Reverse Pre-Diabetes
- ? Balance Blood Sugar
- Category: Health/beauty
- Link: thatmetabolicguy.com
- Phone: +1 641-863-1711
- Featured: "Start here ? Comment RESET on any video and I'll send you exactly what we do"

Instagram (verified): @that_metabolicguy - ~9,597 followers, 630 posts; bio: Reversed Fatty Liver / Reversed Prediabetes / Text RESET to 641-863-1711; highlights: KIDNEY, Diabetes, IBS.

Note: [instagram.com/themetabolicguy](https://www.instagram.com/themetabolicguy) returns unavailable (verified). Site icon may point to a dead handle - branding inconsistency.

3. Content Strategy

Scale of review

- 63 unique comment/thread nodes captured from feed scroll
- Videos tab: dense sample of recent videos (many published within 1-3 days)
- Reels tab: large grid of public view counts
- Full unique long-form caption library is template-clustered (few scripts x many cuts), not 50 independent essays

Limitation (honest): Exact "latest 50 unique creative concepts" is lower than 50 because the page floods variants of the same scripts. Intelligence is based on those scripts, engagement patterns, and volume - not invented unique posts.

Main content pillars (verified)

1. Insulin resistance as master key - symptom list -> "it's insulin resistance" -> reversible
2. Fatty liver education - "doesn't happen overnight / can change" + salt-on-fat visual metaphor
3. Drink / GLP-1 / environment - "drinking the right things but still stuck" -> insulin staying high -> 8 oz/day protocol
4. Carousel teaching - face + bold text claims (liver/insulin micro-lessons)
5. Social proof comments - public results in thread ("Down 60 pounds...") amplified by author DMs
6. Soft-to-hard conversion - education captions that claim "no selling" but end in keyword DM

Educational vs promotional ratio

- Feed captions: Majority educational framing in sampled posts; explicit product language is lighter than the backend (inferred-not a coded percentage audit)
- Actual business model: Most CTAs observed route to product/protocol DM (inferred from keyword patterns)
- Website product page: Fully promotional long-form sales letter (verified)

Storytelling techniques

- Symptom staccato: belly fat / fatty liver / triglycerides / burning feet / brain fog / exhaustion
- Reframe: not luck, not aging -> insulin
- Hope bridge: body wants to heal; family turned this around
- Simplicity: "8 ounces a day -> fix the environment -> let the body respond"
- Anti-elite medicine: "Most doctors treat the symptom. Nobody's treating the cause."
- Personal authority: IBS decade, prediabetes, yo-yo, family labs

Hooks & headlines (observed)

- "Most doctors treat the symptom. Nobody's treating the cause."
- "Most people are drinking all the 'right' things... and still stuck with cravings, belly fat, and zero energy."
- "Fatty liver doesn't happen overnight... and it usually doesn't go away overnight either."
- "We used to have FATTY LIVER" (on-video text)
- Carousel micro-hooks: "Your fatty liver started with insulin. Not food. Not drinking." / "Your liver can reverse this." / "The fix isn't a detox..."

Visual style

- Face-to-camera smiling coach (red cap, outdoor/gazebo setting)
- Bold multi-color on-screen text
- Short vertical video demos (salt poured on fat = liver metaphor)
- Carousel grids of teaching cards with face
- Product/protocol implied more than glossy lifestyle brand

Carousel / video / Reel strategy

- Carousels: used as "explainers" with "Save / Share / Comment LIVER"
- Video: primary distribution format; many 8-40 second cuts
- Reels: high volume; public view counts observed including 306K, 278K, 231K, 157K, 110K, 75K, 69K, 19K, 18K, 17K, 13K, 12K and a large band of 4K-9K, plus weak cuts under 1K
- Pattern: same script re-cut with different openers and different keyword CTAs to A/B comment behavior

CTA patterns (verified)

Keyword	Typical promise
RESET	Send exactly what we drink / do
LIVER	More info / protocol for fatty liver / metabolism
INSULIN	What we drink and how we use it
ME / GONE	Same protocol send
Featured pin	Comment RESET on any video

Also: Save + Share prompts on carousels.

Posting frequency

- Verified: multiple videos dated "a day ago" / "2 days ago" / "3 days ago" in videos tab - high daily velocity (likely several posts/day via variants)

- Inferred: volume is a deliberate growth tactic, not organic "when inspired" posting

Best-performing topics (relative, public signals)

Stronger	Weaker (relative)
Fatty liver + LIVER keyword	Low-view reposts of same script (<200-600 views)
Drink protocol + INSULIN/RESET	Purely text-weak variants with few comments
Symptom cluster -> IR carousels	
Reel outliers (100K-300K class)	

Note: "Best/worst" here is public view/comment UI, not Meta Insights. Without Insights, paid boost vs pure organic is Unknown.

4. Engagement Strategy

Lever	What they do	Evidence
Comments	Keyword gates (RESET/LIVER/INSULIN...)	Verified
Shares	Explicit "Share it with someone who nee	Verified
Discussion	Minimal long public debate; funnel to D	Verified
Keyword CTAs	Core system	Verified
DM asks	"I'll send you..." + public "messaging y	Verified
Community style	High-speed, templated, personal first n	Verified
Response time	Many replies within hours of comment ti	Verified pattern; exact SLA Unknown
Comment quality	Mostly one-word keywords + occasional p	Verified

Engagement pattern (inferred): In sampled posts, comments often exceed reactions (e.g., 29 reactions / 63 comments; 63 / 344; 25 / 112). This is consistent with comment-gated CTA design that boosts conversation volume-not proven as a deliberate "algorithm exploit."

5. Lead Generation & Customer Journey

Observed journey (verified steps)

```

Facebook / Instagram Reel or Video
  v
Keyword comment (RESET / LIVER / INSULIN / ME / GONE)
  v
Author public reply -> Messenger
  v
DM script (not fully visible publicly) -> protocol info
  v
thatmetabolicguy.com OR direct product link OR SMS
  v
/product long-form sales page
  v
CTA -> ufeelgreat.com/c/B54FED (Feel Great / Unicity checkout)
  v

```

Coaching + community + reorder residual

Parallel path:

Homepage -> "Earn With Me" -> /business -> apply form (MLM / affiliate)

Homepage -> "Text Me" SMS +1 641-863-1711

Instagram -> Text RESET

Lead gen assets

Asset	Status
Lead magnets as free PDFs	Not observed as primary; value is "I'll send what we do" vi
Free offers	Protocol info / how we use products
Assessments	Not observed as quiz; bloodwork mentioned for guarantee
Booking strategy	Coaching framed as included with protocol, not classic cons
Funnels	Product funnel + business opportunity funnel
Landing pages	Strong long-form product page
Email capture	Not primary on FB; product page is click-to-buy
Messenger automation	Inferred likely (volume + templated replies); exact bot vs
Bio optimization	Strong single link + featured RESET instruction
Link strategy	Clean: thatmetabolicguy.com hub with 3 doors
Appointment flow	Soft coaching inclusion, not Calendly-first

6. Website Analysis (thatmetabolicguy.com)

Area	Assessment	Notes
Homepage	Minimal hub	Photo + one-liner + 3 CTAs
Product LP	Strong long-form conversion page	Video, problem/agitation, mechanism, Oz
Copywriting	Classic direct-response structure (anal	Specific numbers claimed on-page (43% s
CTA placement	Multiple above/mid/below fold	"Yes - Get Me Started"
Navigation	Intentionally tiny	Reduces leak
Trust	Family story, transformations, research	Affiliate disclosure present
Mobile	Inferred mobile-first (phone CTA, short	Full lab device matrix Unknown
Speed	Not lab-measured	Unknown exacts
SEO content/blog	No educational blog observed	Site is funnel, not media

Business page sells residual income, no inventory, Unicity-backed manufacturing/shipping, weekly coaching - classic network marketing positioning with income disclaimer.

7. Meta Strategy

Element	TMG
Organic reach	High-volume short video + comment bait
Facebook optimization	Clear bio, featured CTA, phone, single site, Reels/Videos h

Instagram	Active @that_metabolicguy; highlights as condition doors
Reels	Primary growth surface (large view outliers)
Lives	Not observed in this scrape
Community	Public comment->DM; private community promised post-purchase
Profile	Consistent 3-line value stack

8. SEO

Factor	TMG	Notes
Keywords	Metabolic health, insulin, fatty liver,	In content, not a content site
Blog	Absent / not found	Weak SEO authority building
Local SEO	Not local-clinic oriented	National/product model
Authority	Personal story + product claims + affil	Not medical practice authority
Educational content	Lives on Meta, not owned media	Platform risk

9. Sales Psychology

Lever	How used
Trust	Face, family story, "I'll personally guide first 30 days"
Authority	Lab language, "clinically studied," third-party testing bad
Scarcity	Soft (health crisis timing on business page); not hard count
Social proof	Transformation gallery + comment wins
Storytelling	Before/after metabolic identity arc
Objection handling	FAQ: diet change, meds, Ozempic, speed, refund
Risk reduction	90-day money-back + bloodwork guarantee framing
Offer positioning	Natural GLP-1 vs injection; no diet required; two steps

10. Competitive Advantages (what they do exceptionally well)

1. Single-root narrative discipline - everything returns to insulin/metabolic environment.
2. Comment->DM machine - scalable conversation leads.
3. Creative volume - same winners, many cuts.
4. CTA clarity - one action per post.
5. Funnel simplicity - hub -> product -> checkout.
6. Risk reversal stronger than most wellness coaches.
7. Condition bridges (liver, kidney highlight, diabetes, IBS).
8. Personal brand name ("That Metabolic Guy") is memorable and easy to recall in-category.
9. Dual monetization paths exist (consumer protocol + opportunity funnel)-commercial LTV impact is Unknown without private data; dual path also creates brand-perception risk for some buyers.

Where TMG currently demonstrates stronger public signals than PIW

Audience size, content velocity, comment engagement, Reel reach, conversion-page polish, keyword system, DM ops, and single-path profile clarity (as of 2026-07-23 public review).

11. Weaknesses / Missed Opportunities (TMG)

Weakness	Why it matters for PIW
Heavy Unicity / MLM dual path	Easy to be perceived as "another product pusher"
Caption claims "no selling" while funnel is product	Trust friction for sophisticated buyers
Extreme content repetition	Fatigue; also easy for competitors to pattern-match
Weak owned SEO/blog	Platform-dependent
IG handle inconsistency (themetabolicguy dead)	Brand hygiene miss
Medical claims risk (reverse, fix, no side effects language)	Compliance exposure
Low long-form education depth on site	Authority limited to ads/social
Public engagement quality shallow (one-word comments)	Community is pipeline, not tribe
Not a local clinical relationship model	PIW can differentiate here

12. Opportunities for PIW (Competitor-Derived Only)

Each item below is a lesson taken from TMG's observed system-not a recycle of separate funnel/infrastructure diagnostics.

Quick wins (this week)

13. Content Ideas (50) - inspired by competitor, not copied

Each idea ends with a PIW-native CTA angle (assessment / consult / education), not product spam.

1. "Your labs can be 'normal' and your metabolism still stuck - here's the missing marker conversation."
2. "Why belly fat ignores your treadmill."
3. "The 3pm craving is a blood sugar story, not a character flaw."
4. "Fatty liver is often a silent insulin story."
5. "What insulin resistance feels like before diabetes shows up."
6. "If willpower worked, you wouldn't be reading this."
7. "Why cutting calories can make metabolic repair harder."
8. "Brain fog after lunch: spike, crash, repeat."
9. "Burning feet and metabolic nerves - when to ask better questions."
10. "Prediabetes is a fork in the road, not a life sentence."
11. "What I wish someone explained about insulin in plain English."
12. "Stubborn weight after 40: hormones vs insulin vs both."
13. "The difference between managing symptoms and changing the environment."
14. "GLP-1 explained without the hype or the fear."
15. "Why 'eat less move more' fails people with IR."
16. "A one-page map of how insulin resistance shows up in real life."
17. "Energy crashes are data - not laziness."
18. "How we use a free assessment before we recommend a plan."
19. "What happens on a metabolic consult (demystify)."
20. "Three questions to ask before another detox."
21. "Why your liver is part of your weight story."
22. "Triglycerides and belly fat: connected more than people think."
23. "Women's metabolic plateaus - patterns we see."
24. "Men's silent belly fat and blood sugar."
25. "Sleep, stress, and insulin: the triangle nobody posts about enough."
26. "Walking after meals: underrated metabolic lever."
27. "Protein timing for cravings (education, not meal plan spam)."
28. "Fiber myths vs useful fiber strategy."
29. "Intermittent fasting: who it helps, who should be careful."
30. "Why we start with assessment, not a product pitch."

31. "Client language: 'I did everything right' - decode it."
32. "Before/after energy stories (with consent)."
33. "Lab printout reaction video (education, not diagnosis)."
34. "Myth: fatty liver only happens to heavy drinkers."
35. "Myth: thin people can't be insulin resistant."
36. "Myth: you need extreme keto forever."
37. "How accountability changes metabolic follow-through."
38. "Skool community: what we teach in week 1."
39. "Local Tyler: metabolic health is a community problem."
40. "Text RESET vs Comment ASSESS - how to get help from us."
41. "Ozempic questions people are afraid to ask (neutral education)."
42. "Natural approaches people confuse with medical care - boundaries."
43. "What 'root cause' actually means at PIW."
44. "A 60-second insulin resistance whiteboard."
45. "Carousel: 7 signs your metabolism needs a look."
46. "Save this: grocery swaps that support steadier energy."
47. "Share this with someone stuck on the same weight for years."
48. "Live: bring your biggest metabolic question."
49. "Why we refuse cookie-cutter plans without assessment."
50. "From overwhelm to one next step - the PIW pathway."

Better hooks (PIW-native)

- "If weight loss feels impossible, it may not be a willpower problem."
- "Comment ASSESS if you want the free insulin resistance assessment we use with new clients."
- "Most people try another diet. Few people measure the pattern underneath it."

Better CTAs for PIW

- Comment ASSESS / READY / LABS -> DM assessment link
- Text RESET to PIW number (already in use - keep consistent)
- "Save this map / share with a spouse"
- Soft: "Book free consult after assessment" - not cold hard sell in every video

14. Strategic Comparison (Public Signals Only)

Relative strength = public observable signals as of 2026-07-23-not a claim about private revenue or clinical quality.

Dimension	That Metabolic Guy	PIW (public signals)	Relative strength	Competitor-derived deci
Followers (FB)	~40K	Early-stage (~39)	TMG scale	Invest in distribution,
IG	~9.6K (@that_metabolicg)	Present	TMG scale	Mirror cadence if capac

Content velocity	Very high	Lower	TMG	High-frequency educatio
CTA system	Keyword -> DM	Assessment link + SMS o	TMG execution	Add keyword micro-commi
Path clarity	Clean hub (3 doors)	Multiple destinations h	TMG	One primary CTA path
Lead engine	High public DM volume	Less visible conversati	TMG (public)	Conversation-led captur
Local trust	Weak	Address, phone, founder	PIW	Emphasize as differenti
Positioning risk	Product + opportunity d	Assessment-led care pat	Context-dependent	Do not default to rep-p

Social proof	Transformations on prod	Proof system varies by	TMG on product LP	Schedule real proof con
SEO/blog	Weak	Weak	Neither	Optional long-term owne
Differentiation	Personal product brand	Assessment + coaching +	PIW if executed	Own care positioning

What PIW already demonstrates better (public)

- Clear assessment-first intent (not only buy-now)
- Local legitimacy signals
- Founders story framed as care mission
- Multiple care assets (assessment, consult, community, accountability)

What PIW should adopt from TMG (principles)

- Keyword comment system
- High-frequency educational short video
- Single featured / primary CTA
- Condition-bridge education
- Rapid reply SOP
- Long-form conversion clarity (without unsubstantiated claims)
- One primary path from social

What PIW should avoid copying

- Generic Feel Great / Unicity "rep page" identity
- Caption posture of "no selling" while only selling
- Unfiltered disease-cure / "no side effects" claim language
- Opportunity/MLM dual branding unless that is an intentional PIW business line
- Pure one-word community with no real care delivery behind it

Systems to build (competitor-derived-not a site hygiene list)

- Keyword -> DM SOP and templates
- Reel production cadence and ManyCuts workflow
- Educational series / condition-bridge library
- Insights-driven weekly review (comments, DMs, assessment starts, booked calls)
- Optional: owned education hub; paid amplification of proven winners

Deliverable A - SWOT (That Metabolic Guy)

Strengths

Audience, velocity, CTA discipline, funnel simplicity, personal brand, risk reversal, condition bridges

Weaknesses

Product/MLM perception, repetition, weak SEO, compliance risk, shallow public community

Opportunities (for them)

SEO blog, cleaner IG handle, deeper email, lives

Threats (to them)

Platform policy, market saturation of Feel Great creators, trust backlash

Deliverable A2 - SWOT (PIW relative - brief)

Strengths

Assessment-first intent, local trust potential, dual founders story, care positioning

Weaknesses (distribution, not a full ops audit)

Lower reach and content velocity; less visible conversation engine; risk of category sameness

Opportunities

Own the "assessment-led metabolic care" lane; out-educate pure product spam; local + virtual hybrid

Threats

Category noise from TMG-like creators; looking interchangeable; underpowered top-of-funnel

Deliverable B - Competitor Scorecard (1-10)

Category	Score	Rationale
Brand positioning clarity	9	Instantly clear
Content strategy	8	High velocity, low variety depth
Engagement engine	9	Keyword + DM mastery
Lead generation	8	Strong social->DM->product (email weak)
Website conversion	8	Product LP strong structure; hub thin (
Meta/Reels execution	9	Scale + public view outliers

Sales psychology	9	Classic direct-response structure
Trust / compliance posture	5	Aggressive claims + dual opportunity pa
Differentiation durability	6	Easy to pattern-match within similar pr
Overall	7.4	Strong public distribution machine (ana

Scores = analyst judgment for strategic discussion, not measured KPIs.

Deliverable C - PIW Scorecard (1-10) - public signals only

Category	Score	Rationale
Brand positioning clarity	7	Clear IR / assessment message
Content strategy	3	Early stage, lower velocity
Engagement engine	2	Limited public conversation volume
Lead generation (public)	3	Assessment path exists; conversation en
Website conversion (public)	5	Assessment offer present; full conversi
Meta/Reels execution	3	Present but small scale
SEO / owned media	2	Weak
Sales psychology	5	Story exists; proof cadence incomplete
Trust / compliance posture	6	Care framing stronger than hard product

Differentiation durability	7	Can own assessment-care if executed
Overall	4.3	Strong intent; distribution system stil

Not a substitute for a dedicated funnel audit. Infrastructure hygiene is out of scope here.

Deliverable D - Side-by-side (action-oriented)

Factor	TMG	PIW	Competitor-derived action
Audience	40K FB / 9.6K IG	Early FB footprint	Raise content velocity + dist
Hook quality	High	Emerging	Build a hook bank from client
CTA	Keyword -> DM	Link + SMS	Combine: keyword micro-commit
Funnel	Product buy	Assessment -> consult	Keep assessment; borrow convey
Proof	Transformations on LP	Variable	Schedule real proof content
Path clarity	High	Improve toward one primary path	One primary CTA from social
Care model	Product + coach	Education + accountability	Emphasize care difference in
Brand risk	Opportunity dual path	Care positioning available	Do not default to rep-page id

Deliverable E - Prioritized action plan (competitor-derived)

P0 (48 hours)

1. Define one primary social CTA path (assessment or consult-pick one primary)
2. Featured post/bio instruction: Comment ASSESS / READY (or aligned keyword)
3. Install keyword reply SOP (same-day Messenger redirect)
4. Write 10 hooks + 5 scripts using TMG structure, PIW claims policy

P1 (7 days)

5. Batch-film 7 educational Reels (IR hub + condition bridges + pathway)
6. Publish on a fixed cadence; pin best "start here" post
7. DM templates for keyword -> assessment link
8. Align SMS and comment language so the consumer hears one system

P2 (30 days)

9. Content calendar 5x/week
10. 15-script library + ManyCuts on winners
11. Email/SMS nurture after assessment
12. Real proof content filmed (consent)
13. Weekly metrics: posts, comments, DMs, assessment starts, booked calls

P3 (90 days)

14. Paid boost only on proven organic winners
15. Local trust / SEO content as differentiator
16. Owned educational resource hub (optional compounder)
17. Community used for retention after the primary conversion path

Deliverable F - Top recommendations (classified)

#	Recommendation	Priority	Difficulty	Expected impact
1	One positioning line: a	Critical	Easy	Very High

15	Pin educational + CTA h	High	Easy	High
16	Local trust posts month	Medium	Easy	Medium
17	Live Q&A monthly	Medium	Moderate	Medium
18	North-star: comments ->	Critical	Easy	High
19	Quarterly competitor re	Medium	Easy	Medium
20	Owned education hub (lo	Medium	Difficult	High compounding

Infrastructure / site-hygiene actions are intentionally excluded-handle in funnel diagnostics if needed.

Deliverable G - Highest ROI improvements (from this competitor)

1. High-frequency educational Reels with one IR hub narrative
2. Keyword -> DM -> assessment (TMG engine, PIW offer)
3. Single clear CTA path from every social surface
4. Faster comment-response SOP
5. Consistent cadence + ManyCuts on winners
6. Stronger educational positioning (teach first; offer second)

Deliverable H - Immediate next steps (checklist)

- [] Confirm one primary CTA path from Facebook/Instagram
- [] Featured keyword instruction on Page
- [] Write 10 hooks + 5 scripts today
- [] Film batch of 5-7 educational Reels
- [] Create DM templates for ASSESS / READY / LABS

- [] Same-day comment reply SOP live
 - [] Claims policy (filter "cure / reverse disease / no side effects" language)
 - [] 30-day content calendar locked
 - [] Weekly scorecard: posts, comments, DMs, assessment starts, consults
-

Evidence appendix (selected verified facts)

Fact	Source

PIW FB early-stage footprint (~39)	Live page (context only)
PIW free-assessment + founder story present	Live page (context only)

Research limitations

1. Meta Ads Library / paid spend: not fully audited in this pass.
 2. Private Messenger scripts and conversion rates: not visible (major funnel black box).
 3. Exact posting calendar timestamps limited by FB UI.
 4. Full 50 unique creative concepts not available because of heavy templating - analysis covers the template system thoroughly.
 5. Speed metrics (Core Web Vitals) not lab-tested.
 6. PIW operational funnel health is out of scope here; use a dedicated lead-gen diagnosis for infrastructure items.
 7. Composite scorecards are analyst judgment, not measured revenue or Insights exports.
-

Strategic close

TMG currently demonstrates stronger distribution and conversation-to-offer mechanics on public Meta surfaces. PIW can demonstrate stronger trust, assessment-led care, and non-spam positioning-if it installs the same discipline of clarity, cadence, keyword-led conversations, and a single clear next step.

Copy the system. Do not copy the supplement sales identity.
