

Pristine Image Wellness

Lead Generation Root Cause Diagnosis

Chief Marketing Officer / Growth Analyst / CRO lens

Client: Troy Wallace | Prepared: 2026-07-22

Evidence-based diagnosis. No invented metrics.

Scope note: Personal Systeme.io accounts are excluded from PIW production conclusions.

Client priority (Slack)

"I'm not seeing any leads generated by the funnel. That is the most important thing. If we're not producing leads, then nothing else matters! Whatever it takes to generate leads and sales is where we need to go."

Source: Slack DM ? wallaceonlineteam (Troy), ~2026-07-21 evening.

1. Executive Summary

Pristine Image Wellness is not generating measurable funnel leads at a business-useful rate. Live Meta evidence shows a micro-audience and weak distribution. Historical Facebook analytics (Jun 17-Jul 14, 2026) confirm very low reach and engagement volume. Content and strategy assets exist, but top-of-funnel attention is too small to produce consistent opt-ins.

A working capture path does exist: pristineimagewellness.com/free-assessment loads with email capture and has been reached via Facebook (fbclid observed). Instagram shows 'Send me this post' style comments; Troy reported manually sending landing/funnel links. Despite that intent, lead outcomes are not meeting Troy's expectation of leads generated by the funnel.

Primary bottleneck: BEFORE the funnel - insufficient reach and weak conversion of attention into one clear opt-in action. Secondary: fulfillment/ops (IG reply access, single CTA discipline). Not primary: more content strategy documents. Note: Older domain/funnel URLs that 404 after domain migration are excluded from this diagnosis; they are not treated as currently published social destinations.

Primary recommendation priority

- One primary live URL everywhere: free-assessment (keep Skool secondary).
- Prove one test opt-in end-to-end on the LIVE client path.
- Publish with keyword CTAs + same-day DM; measure new leads weekly.
- Increase reach/publish velocity with education + clear CTA.

2. Social Media Evidence

2.1 Live Meta Business Suite (2026-07-22)

Facebook followers	39
Instagram followers	105
Weekly plan tasks	0 of 5 completed
FB posts (weekly goal)	1 / 7
IG story / Ad	0 / 1 each
Sample post viewers (Jul 7 UI)	6 viewers, 0 comments
Comments needing attention	3

2.2 Facebook Analytics Report (Jun 17 ? Jul 14, 2026)

Posts published	19
Total views	954
Total reach	452
Engagements (all)	36
Approx. views/post	~50
Approx. reach/post	~24
Engagements/post	~1.9
Reach per day (approx.)	~16 accounts/day

Top reach post in that period (~213 reach / 260 views) had only 1 engagement. Even relative 'winners' are not converting attention into comments/DMs/leads.

2.3 Instagram (live profile + Slack ops notes)

- Profile: @pristineimagewellness - 26 posts, 105 followers, 61 following.
- Slack (Jul 6-7): multiple IG comments 'Send me this post'. You only had Meta Business Suite analytics access, not IG reply/DM access.
- Troy replied he sent those people the landing page of the funnel - interest exists; fulfillment is manual.
- Slack (Jul 21): you noted many IG comments appear to be other wellness pages, not real prospects (engagement farming).

2.4 Live destination audit (PIW production paths)

free-assessment	OK - loads, email capture present
Skool community	OK
Lovable app / story	OK
RevScan report	OK - 23/100
Marketing Guru (piwguru.lovable.app)	OK - sign-in / dashboard
Facebook page / Meta Business Suite	OK
Instagram profile + sample post	OK

Scope exclusion: Older funnel URLs on a prior domain (domain migration) may return 404 and were not published as current social destinations. Those URLs are ignored for root-cause ranking. Personal Systeme workspaces are also out of scope.

3. Slack Context ? MarketingSecrets.AI & Marketing Guru

3.1 MarketingSecrets.AI (July 1, Slack)

Troy shared that he has a Russell Brunson MarketingSecrets.AI subscription, invited you to the account, and ran a Revenue Scan on the funnel. He shared the RevScan link (23/100) and pointed you to Sprints training.

3.2 Marketing Guru (Slack)

Troy built Marketing Guru (piwguru.lovable.app), trained on Pristine Image Wellness (plus Unicity and Brunson materials in the 'brain'). He asked you to compare Guru vs MarketingSecrets.AI to see if Guru could replace the paid Secrets subscription. You tested it after login was fixed and reported that Guru understands PIW well, while Secrets felt more like a 'Chief of Staff' (checks missing prerequisites).

Note: Credentials were shared in Slack. Recommend rotating passwords and using multi-user access properly.

3.3 RevScan alignment (23/100)

- Overall AI readiness: 23/100
- Social Media Engine: 18/100
- Ad Creative & Traffic Quality: 8/100
- Funnel Intelligence: 38/100
- Attractive Character & Email: 28/100

RevScan's weak social/ads scores align with live Meta micro-audience and low organic viewers. Dollar opportunity figures are model estimates, not verified PIW financials.

4. Funnel & Capture Findings (PIW-scoped)

Client-facing capture that works today: pristineimagewellness.com/free-assessment (DOWNLOAD NOW / GET FREE ACCESS NOW, email field; Facebook fbclid observed).

Slack history documents funnel/automation build work with Troy over May-June (pages, nurture planning, DNS/sender setup, booking embed). Current primary live public capture path for this diagnosis is the free-assessment URL. Prior-domain URLs after migration are excluded (not treated as live social CTAs).

Operational gap: Instagram comment/DM fulfillment was not fully delegated (analytics-only MBS access). Troy manually messaged landing links - not a scalable or measurable CRM system.

Out of scope

- Personal Systeme.io workspaces - not PIW production.
- Old/migrated domain funnel URLs that 404 - not published on current social; ignore.

5. Customer Journey Map (Evidence Levels)

Stage	Signal	Confidence
FB / IG audience pool	39 FB / 105 IG followers	High
Monthly FB reach (Jun 17-Jul 14)	452 accounts	High
Typical post visibility	~24 reach / ~50 views	High
Sample live post viewers	6	Medium-High
IG 'send this post' comments	Multiple (Slack)	High
Manual landing links by Troy	Yes (Slack)	High
Working assessment page	free-assessment OK	High

Lead outcome (Troy KPI)	Not seeing funnel leads	High (client KPI)
-------------------------	-------------------------	-------------------

6. Root Cause Ranking

#1 ? Insufficient reach / micro-audience + low publish velocity

Evidence: Analytics 452 reach/month; 39/105 followers; weekly 1/7 posts; sample 6 viewers

Business impact: Critical

#2 ? Weak conversion of attention into lead actions

Evidence: Best historical post 213 reach with 1 engagement; few keyword-to-DM loops at scale

Business impact: Critical

#3 ? Lead fulfillment / access gaps

Evidence: IG DM access limited; Troy manually sends links; not CRM-scale

Business impact: High

#4 ? Capture outcome not meeting Troy KPI

Evidence: free-assessment works; client still not seeing funnel leads

Business impact: High

#5 ? Path discipline (multiple secondary destinations)

Evidence: Assessment primary vs Skool/Lovable secondary; keep one primary CTA

Business impact: Medium-High

#6 ? Measurement gap (Insights + lead KPI)

Evidence: Full 30/60/90 Insights not fully exported; success should track leads not likes

Business impact: High

#7 ? Strategy over-built, execution under-closed

Evidence: Calendars, SOPs, competitor briefs ready; velocity and lead proof lag

Business impact: Medium-High

7. Answers to Core Questions

1. Why are we not generating leads?

Because almost nobody reaches the opt-in path at meaningful volume, and attention that does exist rarely converts into measurable leads. Social reach is tiny; some engagement is low-quality or manually handled without a scalable capture system.

2. What is the primary bottleneck?

Before the funnel: distribution (reach/publish) + conversion of attention into one clear CTA. Then ops to fulfill DMs/comments and store leads.

3. Before, inside, or after the funnel?

Primary: before. Secondary: capture/fulfillment ops. Not primary: email nurture polish - there is no healthy lead volume to nurture yet.

4. Evidence?

Jun-Jul analytics (452 reach / 36 eng / 19 posts); live MBS (39/105, 6 viewers); free-assessment OK; Slack IG comment/manual send notes; RevScan 23/100.

5. Missed opportunities?

Single primary CTA (free-assessment); IG reply access or process; weekly lead KPI; one end-to-end opt-in test; keyword CTAs at scale.

6. Highest-impact actions?

- P0: free-assessment as sole primary link (FB/IG/posts/manual replies).
- P0: one controlled test opt-in on live path; verify confirmation/email.
- P0: keyword CTA + same-day DM with working link; track new leads weekly.
- P0: increase publish/reach velocity with education content.
- P1: Meta Insights export 30/60/90; IG access for fulfillment.
- P2: ads only after path is proven.

8. Comparison Across Sources

Where sources agree

- Social scale is early/weak (analytics, MBS, RevScan social score, strategy docs).
- Free assessment is the right core offer.
- Troy cares about leads/sales above content vanity (Slack).
- Education + clear CTA is the right content system (Metabolic Boss lessons).

Where execution diverges from prior recommendations

- Prior advice: single primary assessment CTA - keep Skool/secondary links secondary.
- Keyword-to-DM system recommended; volume/fulfillment still limited.
- Strategy assets ready; reach and lead proof lag.

MarketingSecrets.AI vs Marketing Guru (from Slack, not separate files)

- Secrets: paid Brunson platform + Sprints + RevScan diagnostic.
- Guru: Troy-built PIW-specific brain (piwguru.lovable.app); compare for cost replacement.
- Your Slack testing: Guru strong on PIW context; Secrets more 'Chief of Staff' process checks.

9. Scope & Integrity

- No invented 30/60/90 Insights numbers without exports.
- Personal Systeme workspaces excluded from PIW production conclusions.
- Migrated/old domain URLs that 404 are excluded (not current social CTAs).
- RevScan dollar figures treated as model estimates.
- Hypotheses labeled where form-to-CRM mechanics need a controlled test.

Bottom line for Troy: The problem is not a shortage of ideas. PIW lacks enough attention converting into ONE live opt-in path (free-assessment), with manual fulfillment and limited reach. Fix distribution + CTA discipline + proof of capture before more strategy work.

Prepared for Pristine Image Wellness / Troy Wallace. Evidence compiled 2026-07-22 from Meta Business Suite, Facebook/Instagram public surfaces, Jun 17-Jul 14 analytics report, Slack DM (wallaceonlineteam), RevScan, Marketing Guru/Secrets context in Slack, and live link verification. Confidential client material.
