

SOP

Title: Create an Automation Rule – SOP

Frequency: Per Funnel / Per Automation Setup

Outcome:

- An automation rule is created successfully.
- The correct trigger and action are configured.
- The automation runs automatically when the trigger conditions are met.

Steps:

- Log in to systeme.io.
- Click **Automations**.
- Select **Rules**.
- Click **Create**.
- Click the **+** icon under **Trigger**.
- Select the appropriate trigger based on your use case.
- Configure the trigger settings.
- If using **Funnel Step Form Subscribed**, select the funnel and page.
- If applicable, choose **Field** or **Form Element**.
- Click the **+** icon under **Action**.
- Select the required action.
- If using **Send Email**, select an existing email or click the **+** icon to create a new email.
- Configure any additional action settings.
- Click **Save Rule**.
- Test the automation to verify the trigger activates the selected action.
- Confirm the automation functions as expected.

Reference Materials:

- ☐ Automation rule has been created.
- ☐ Correct trigger has been selected.
- ☐ Trigger settings have been configured.
- ☐ Funnel and page have been selected, if applicable.

- ☐ Field or Form Element has been selected, if applicable.
