

SOP

Title: Add a Popup to a Page – SOP

Frequency: Per Page / Per Launch

Outcome:

- A popup is added to the selected page.
 - The popup displays using the configured trigger and settings.
 - Form submissions are saved and visitors are redirected successfully.
-

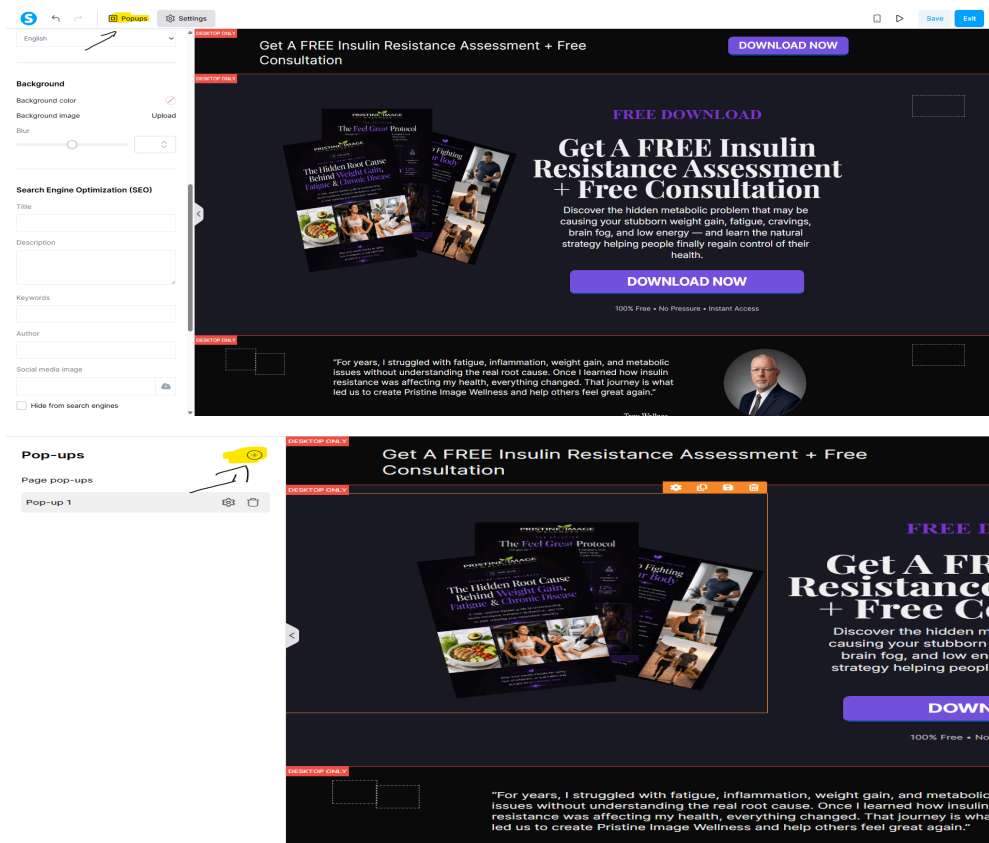

Steps:

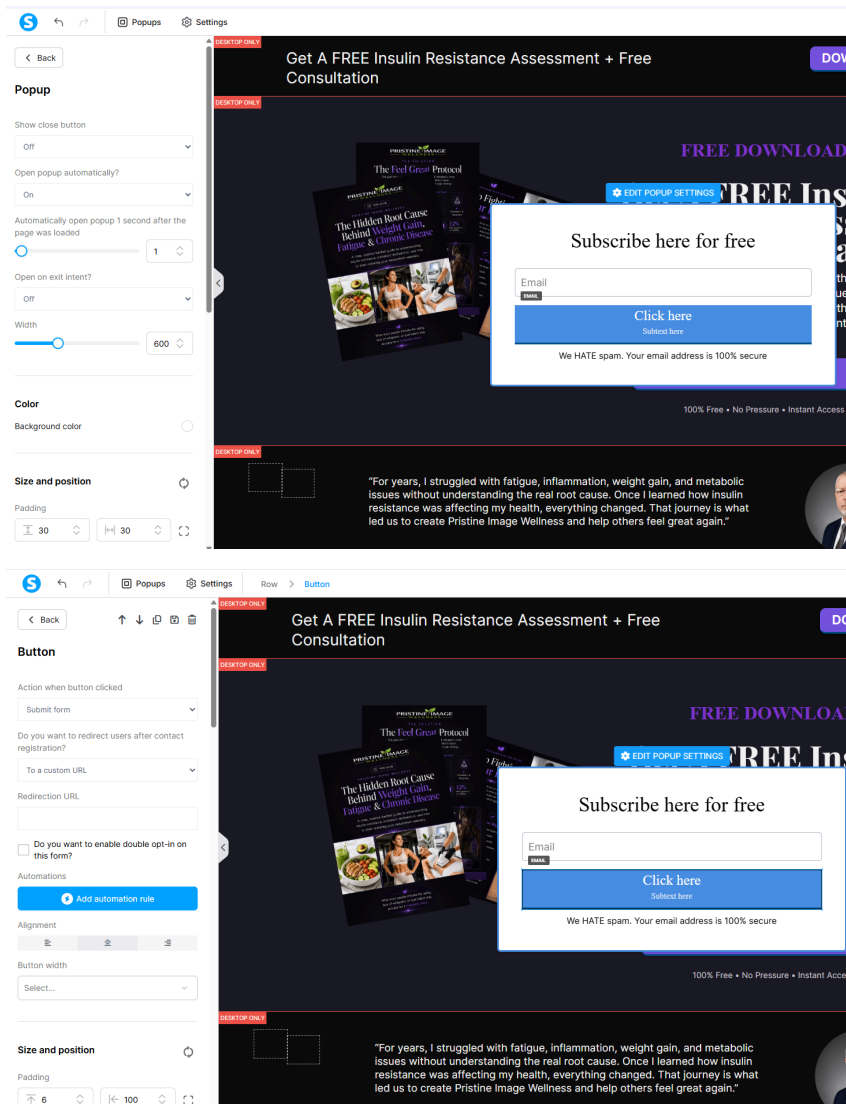

1. Open the Funnel

1. Steps:
2. Log in to systeme.io.
3. Open the page where the popup will be added.
4. Click **Edit Page**.
5. Click **Popups** in the upper left corner.
6. Click the **+** icon to create a new popup.
7. Click **Edit Popup Settings**.
8. Configure the popup settings:
9. Show close button.
10. Open popup automatically.
11. Set the popup delay in seconds.
12. Enable or disable Exit Intent.
13. Customize the popup content.
14. Select the popup button.
15. Set **Action when button clicked** to **Submit form**.
16. Select the redirect option after contact registration.
17. Enter the **Redirection URL** if using a custom URL.
18. Save the page.
